

Shiven Gohil

Jamnagar shivengohil210204@gmail.com +919879621675  [ShivenGohil21](#)  [Shiven Gohil](#)  [Portfolio](#)

Education

Bachelor's: B.Tech in Computer Science, Pandit Deendayal Energy University, Gandhinagar (CGPA: 7.09) (Sept 2023 – May 2026)

Coursework: DBMS, OS, Computational Theory, Data Structure, Compiler Design, Networks, Cloud Computing.

Experience

[Zidio Development](#)  **(Web Development Intern)** Bangalore, India *[June 2025 – August 2025]*

Completed an internship at Zidio Development, where I learned to build full-stack web applications using the MERN stack with exposure to **data management**.

Gaining experience with Git and collaborative team-based workflows.

Built an Excel Analytics app for users to upload/view Excel files, demonstrating strong skills in **data analytics** and **data management** by displaying data in tables and interactive 2D/3D charts.

[Akash Technolabs](#)  **(MERN Stack Development)** Ahmedabad, India *[January 2026 – May 2026]*

Completed an internship at Akash Technolabs, where I learned the fundamentals of the **MERN Stack** and developed full-stack web applications using modern development practices.

Built **Curated Domestic**, a premium full-stack rental platform for home appliances with secure authentication, OTP verification, JWT-based authorization, and role-based access control.

Implemented advanced features including **Razorpay payment integration**, rental management dashboards, wishlist functionality, inventory synchronization, invoice generation, and real-time order tracking using **React**, **Node.js**, **Express.js**, and **MongoDB**.

Projects

1. [Pharmacy App Design](#)  **(Figma)** *[May 2024]*

Designed a complete pharmacy app UI/UX flow including Login, Signup, and Logout screens for user authentication.

Created interactive screens for medicine selection, MRP viewing, and location tracking using Figma prototyping tools.

Integrated user pathways to explore specialist doctor profiles, healthcare details, and activity-based recommendations (e.g., running, sports).

Focused on clean, responsive layout with intuitive navigation for enhanced user experience on both mobile and tablet screens.

2. [Fake News Predictions](#)  **(Python, Scikit-learn, NLTK, TF-IDF, Logistic Regression)** *[February 2025]*

Developed a fake news classifier using Logistic Regression, achieving 97.91 accuracy on a dataset of 20,800 articles.

Performed text preprocessing with NLTK (stopword removal, stemming) and regular expressions for data cleaning.

Engineered features by combining author names and titles, then applied TF-IDF vectorization to convert text into numerical form.

Trained and evaluated the model using train/test split, and documented the process in a clear, modular Jupyter Notebook.

3. **GATE Quiz Portal (Django + React-JS + Bootstrap)** *[GitHub]*

Built a secure quiz platform with Login, Signup, and personalized greetings using Django authentication.

Enabled dynamic quiz rendering via Django models with timers, instructions, MCQs, and a user-specific header + calculator.

Designed a responsive UI with question navigation, answer-based color indicators, shuffling, and real-time status tracking.

Added anti-cheating features: full-screen enforcement (auto-logout), copy-paste restriction, and secure result reporting with score, analysis, and feedback.

Skills

Design: Figma

Frontend: HTML, CSS, JavaScript, ReactJS, NextJS

Libraries/Frameworks: Bootstrap, Tailwind, Scikit-learn, NLTK, Pandas

Backend: NodeJS, ExpressJS, MongoDB, Django, MySQL, NextJS

Languages: Java, Python

Soft Skills: Leadership, Communication, Strategic Reasoning, Active Listening

Achievement

IBM's Fundamentals of Cybersecurity – Basics of security, cryptography, threat analysis, and risk management.
